Custom Reports. Fast and Easy.

R&R Report Writers take data stored in your database and turn it into easy-to-read, comprehensive reports... without programming! Design any report layout you need: simple columnar listings, mailing labels, form letters, even complex multi-page reports.

R&R Report Writer is easy enough for novice users, yet powerful enough to satisfy the most demanding application developers. With intuitive Lotus-like menus, you'll be creating reports soon after opening the package. You don't even have to know that much about databases to create sophisticated, professional-quality reports.

When your reports look great, you look great! With full built-in font support and WYSIWYG print preview, your output will look exactly as you envisioned it. For developers, R&R also includes an *unlimited runtime version — absolutely free!*
